

EXAM-Training and Certification

Program for developing and executing automated tests

**Homogeneous test processes, reusable test cases, comprehensive testing:
EXAM – the solution including a sophisticated methodology for the graphical
development of test cases.**

- » Remote and/or classroom formats
- » Conducted by experienced trainers
- » Intensive courses in small groups
- » Role-based certification

Training: EXAM Test Designer

By attending this MicroNova training course, you will not only gain the necessary knowledge for certification, but also valuable hands-on experience that will strengthen your test automation skills with EXAM.

- » **In-depth training:** The training provides comprehensive knowledge in the **development and execution of automated tests with EXAM**. It includes modules on methodology, graphical test development, test execution, advanced modelling, communication with the test bench as well as error handling and debugging.
- » **Practice-orientated learning:** Practical exercises on a **virtual infrastructure with EXAM clients** on a central server and a virtual HiL platform with a simulation model.
- » **Official certification:** After completing the course, participants have the opportunity to take a digital exam that is independent of location and, if passed, leads to certification as an EXAM Test Designer. This certificate serves as proof of quality and promotes a standardised way of working in projects.
- » **Qualified provider:** As an exclusive EXAM distributor, MicroNova offers professional and practice-orientated training courses based on the latest EXAM version, ensuring the effective use of the test automation solution.
