Duration: Half day

Location: On site at your premises

Dates: On request

499 €

The test automation solution EXAM (EXtended Automation Method) is a uniform, platform-independent language for the representation of test situations. AUDI AG, Volkswagen AG and MicroNova have been developing EXAM together since 2006. The methodology for the graphical development of test cases has since established itself as the standard solution for test automation for hardware-in-the-loop (HiL) simulators in the Volkswagen Group.

As an authorized EXAM training partner and exclusive distributor, MicroNova supports the Volkswagen Group in distributing the tooling free of charge. The overall objective is to develop tests beyond the company's borders to suppliers and OEMs on a common basis in order to increase efficiency. To this purpose, MicroNova offers professional and practice-oriented trainings on test modeling, which support users in the optimal use of EXAM.

Dates

Registrations are possible until two weeks before the training date. Do you have any other requests? Please do not hesitate to contact us to arrange individual dates.

Pricing

The price models of the trainings depend on the number of participants or are listed as package prices.
